

IN THE SPECIFICATION:

Please amend the paragraph at page 2, lines 2 to 11 as follows:

--In general terms, for a user to be able to use a processing peripheral, such as a printer for example, situated in a precise geographical area, it is necessary for ~~[[it]]~~ the user to know the geographical position of all the peripherals which are accessible to ~~[[it]]~~ him via the communication network, cabled or otherwise. ~~[[It]]~~ The user will first have to run through the network in order to obtain a list of the available peripherals, and then obtain, for each of them, its geographical position, and finally choose the peripherals which meet certain distance criteria, such as, for example, the presence of this peripheral at a given place, its distance with respect to the office of the user or that of one of his colleagues, or the fact that the peripheral is outside the office of this same colleague.--

Please amend the paragraph at page 12, lines 2 to 4 as follows:

--A description will now be given of the structure of a selection and configuration device which can be incorporated in one or more of the computers 10 to 13 in the networks 1 to ~~[[3]]~~ 2 described above.--

Please amend the sentence at page 15, lines 29 to 31 as follows:

--According to this information 1200, constraints related to the document ~~1100~~ 1000 and the document 1100 itself, a list of 1400 of printers which are candidates for the printing if performed--.
